IDENTIFIERS	*Oregon

ABSTRACT

This report presents enrollment projections for Oregon's 39 public and private institutions of higher education. An analysis of the summary data indicate: (1) Enrollments in Oregon's colleges and universities are expected to increase by 24,380 full-time equivalent (FTE) students or 24 percent during the next 11 years (1973-74 to 1984-85). (2) In the next 11 years, community colleges will experience a greater numerical and percentage increase in student enrollment than will the public 4-year and the private and independent colleges. The community colleges are expected to increase by 22,526 FTE students or 62 percent; the public 4-year colleges and universities by 952 FTE students or 2 percent; and the private and independent colleges and universities by 902 FTE students or 7 percent. (3) The proportion of Oregon's college enrollments provided for by the public 4-year colleges and universities and the private and independent colleges and universities will continue to decline, although the rate of decline is decreasing as community college enrollment begins to level off. Statistical data is included. (MJM)

INTRODUCTION, ASSUMPTIONS AND GUIDELINES

Introduction

This report presents enrollment projections for Oregon's public, private, and independent institutions of higher education. All thirty-nine two- and four-year institutions have been included. The body of the report is composed almost entirely of statistical tables presenting actual, estimated, and projected enrollment data. This form of presentation is utilized to provide data that will be useful for educational planning at both the state and institutional levels.

Assumptions and Guidelines

Enrollment projections in Oregon have been prepared based on the following assumptions and guidelines:

1. Enrollment projections generally rest upon information concerning the numbers of potential students in the geographic service area of given institutions; historical enrollment trends of the institution; and the most discerning assessment that can be made of special circumstances likely to modify enrollment trends.
2. Enrollments in community colleges reflect management decisions concerning programs, facilities and community needs.
3. In-state enrollments in state supported four-year colleges and universities are functions of the number of high school graduates within the state.

4. Out-of-state enrollment in state supported four-year colleges and universities are controlled by the state and will generally retain a constant relationship to in-state enrollments.
5. Enrollments in private and independent colleges and universities are generally independent of conditions within the state and are more directly related to policies set by the various private and independent colleges and universities.
6. The student survival patterns in colleges and universities will continue to follow historical trends.
7. The impact of wars, domestic crises, and economics will remain relatively constant for the next ten years.

TRENDS IN COLLEGE ENROLLMENTS IN OREGON

An analysis of the summary data presented in Table 1 reveals the following enrollment trends in Oregon's institutions of higher education:

1. Enrollments in Oregon's colleges and universities are expected to increase by 24,380 FTE students or 24 percent during the next eleven years (1973-74 to 1984-85).
2. In the next eleven years, community colleges will experience a greater numerical and percentage increase in student enrollment than will the public four-year and the private and independent colleges and universities. The community colleges are

expected to increase by 22,526 FTE students or 62 percent; the public four-year colleges and universities by 952 FTE students or 2 percent; and the private and independent colleges and universities by 902 FTE students or 7 percent.

3. The proportion of Oregon's college enrollments provided for by the public four-year colleges and universities and the private and independent colleges and universities will continue to decline, although the rate of decline is decreasing as community college enrollment begins to level off.

STATE DEPARTMENT OF HIGHER EDUCATION
ENROLLMENT PROJECTIONS

The Division of Analytic Services of the Department of Higher Education developed enrollment projections for public four-year colleges and universities. These projections were submitted to and approved by the Council's Research and Management Data Committee in January, 1974, and were subsequently approved by the Educational Coordinating Council on January 17, 1974.

The Oregon Department of Higher Education's method of projecting student headcount enrollments consists of the following three operations: (1) projection of freshmen enrollments; (2) projection of the three remaining undergraduate class enrollments; and (3) projection of graduate student enrollments.

The projection of freshmen class enrollments is based on projections of Oregon high school graduates provided by the Oregon State Department of Education. This projection of high school graduates is, itself, based on a grade-succession or cohort-survival method. The projection of the freshmen class at each institution assumes that each year's total freshmen class (including new, transfer, and residual students) will continue to bear the same relationship to that year's high school graduating class as that experienced in the most recent enrollment period. It assumes no specific loss to the community colleges of recent high school graduates and no specific gain due to community college transfers at the freshmen level. This percentage relationship of

freshmen to high school graduates is updated each year at the time new projections of enrollment are made.

The projections of sophomores, juniors, and seniors are made by totaling the actual class survival of the immediate two preceding years for freshmen, sophomores, and juniors, and assumes that the derived survival rates, separate percentages for each class, will continue through the projection period. Transfers from community colleges are included in gross class survival data.

Projections of undergraduate enrollments in the two preceding paragraphs are done separately for resident and for non-resident undergraduate students.

Projection of graduate enrollments have been made by the individual institutions and these projections have been added to the projection of undergraduates made by the board's Division of Institutional Research.

Fall full-time equivalent students are computed using the most current data available from the previous fall. Both undergraduate and graduate FTE students are calculated on a 15 credit hour base.

Three-term full-time equivalent students are based on the average term enrollment at each institution for the last five years.

TABLE 2

SUMMARY OF ACTUAL AND PROJECTED HEADCOUNT AND FTE ENROLLMENTS FOR OREGON STATE DEPARTMENT OF HIGHER EDUCATION INSTITUTIONS

1966-67 to 1984-85

Year (1)	Fall Term Headcount (2)	Fall Term FTE (3)	Average Term FTE (4)

COMMUNITY COLLEGE ENROLLMENT PROJECTIONS

The enrollment projections for the community colleges were developed cooperatively between the staff of the Oregon Board of Education and the individual community colleges. The projections are based on the population growth rates of the local areas, management decisions concerning new facilities and new programs, and the needs of the community for educational programs.

The staff of the Educational Coordinating Council reviewed the projections submitted by Department of Education. It was found that these projections were relatively consistent with historical trends. Several different statistical procedures were used including relating community college district population growth to institutional growth and various forms of regression analysis.

It must be noted that the overall accuracy of community college projections in the past has not been as good as the projections of the four-year institutions. There are several reasons for this. These institutions are relatively new in the state and are experiencing abnormally high growth rates. It is difficult to use these growth rates to predict future growth since these institutions can not sustain these rates of growth. Consequently, subjective judgments must be made relating to the leveling off of enrollments at the individual institutions.

A second factor that has made enrollment projecting difficult at the community colleges is clearly identifying their potential pool of

students. Four-year institutions draw a majority of their students from the graduating high school senior class in the state. The Council has very accurate and detailed information relating to the size of this class and the educational aspirations of these students. Community colleges draw from a much wider range of the population. There is no comprehensive data base on adults' aspirations for more education. Furthermore, the state's policy regarding the funding of adult education and recreational courses has been in flux further complicating the projection process.

The Council is aware of these problems and is working with the Research and Management Data committee to improve the projection techniques.

Notes:

1. The fall term headcount is an unduplicated headcount which includes all students who were enrolled or are projected in both reimbursable and nonreimbursable programs. Historical figures were obtained from Student Enrollment Data reports submitted to the Educational Coordinating Council.

2. The fall term FTE includes all students who were enrolled or are projected in both reimbursable and nonreimbursable programs. Historical figures were obtained from Student Enrollment Data reports submitted to the Educational Coordinating Council.

3. The fall term headcount and FTE projections were calculated by using a ratio based on an average of headcount and FTE figures to total accumulated annual reimbursable FTE.

4. The total accumulated annual reimbursable FTE incorporates all students for which the state reimburses the colleges. Summer session FTE are included in these figures.

PRIVATE AND INDEPENDENT COLLEGE AND UNIVERSITY ENROLLMENT PROJECTIONS

The enrollment projections for the private and independent colleges and universities were prepared by the Educational Coordinating Council using the cohort-survival method. Full-time equivalent projections and average annual FTE projections were made by using ratios based on historical trends of the relationship between headcount and FTE at each institution. The projections were made and sent to each institution for inspection and review.

A vast majority of the institutions accepted the projections made by the Council. However, several changes were made by the institutions. Reed College placed a ceiling on their growth and this is reflected in their projections. George Fox College increased their projections based on an expanded recruiting effort and some new programs being offered. Willamette University adjusted their graduate enrollment projections to reflect the new Graduate School of Administration.

TABLE 10

SUMMARY OF ACTUAL AND PROJECTED HEADCOUNT AND FTE ENROLLMENTS
FOR OREGON PRIVATE AND INDEPENDENT COLLEGES AND UNIVERSITIES

1966-67 to 1984-85

Year (1)	Fall Term Headcount (2)	Fall Term FTE (3)
1966-67	12,226	12,068
1967-68	12,338	12,176
1968-69	11,377	10,979
1969-70	11,533	11,285

APPENDIX C

EDUCATIONAL COORDINATING COUNCIL'S
COMMITTEE ON RESEARCH AND MANAGEMENT DATA

Mr. Guy Lutz
Director of Institutional Research
Department of Higher Education

Mr. Robert Wilkin
Registrar
Lewis and Clark College

Mr. Anthony D. Birch
Director, Budgets & Personnel Services
Oregon State University

Dr. Jennis J. Bapst
Dean, Research & Planning
Mt. Hood Community College

Dr. Keith Evans
Director of Institutional Research
Portland State University

Mr. Mel Earle
Technical Training Service
Portland, Oregon

Mr. Francis Morgan
Director of Institutional Research
University of Portland

Mr. Richard Yocom
Registrar
Willamette University

Ex-Officio Consultants:

Mr. Rick Burke
Legislative Analyst
Legislative Fiscal Division

Dr. Donald Shelton
Executive Secretary
Oregon Community College Association

Mr. James Sexson
Fiscal Analyst, Budget Division
Executive Department

Mr. Jim Sullivan
Executive Director
Oregon Independent College Association
